It is important to evolve with time and introduce new and innovative technologies to our operational portfolio and that is exactly what we are doing with Animus Refractive! Our vision is to create a center of excellence for medical professionals around the world, to be taught and trained by our internationally known academic medical staff, on ground-breaking and everchanging technologies. With the cutting-edge technology of the Refractive Suite of Opto Systems, we open our doors to the world as to join us and enhance their skill-set and operational knowledge on refraction.

Achilleas Davelis
