VARIO CITO 532 – Q-LAS

Ample room for arm rests and accessories

Common sense dictates that by integrating two laser systems into a single workstation will maximize versatility and convenience. VARIO is the only system that enables the diagnostic crossover from the anterior segment to the posterior segment without interruption. Historically, combination designs suffer at the expense of weight, height and optical quality.

As a result, the potential advantages of a combination design are often not achieved.

Combo is redefined by VARIO.

Optic design optimized for specific applications.

Table width enables complete mobility of the operator and patient.

Bonus benefit:
2 independent slit lamps.

Highest flexibility.

Multipurpose and unique.

Joystick with laser trigger

Height adjustment,
slit lamp mobility and
trigger in one.

**Premium eye protection**

Neutral color filter design

- High grade of color fidelity
- Detailed illustration

Your choice:

- Brand contact glasses
- Optics: parallel-/convergent
- foot switch
